The Project on Advanced Systems and Concepts for Countering WMD (PASCC) is run at the Center on Contemporary Studies (CCC) and sponsored by the Defense Threat Reduction Agency. PASCC awards and supports strategic studies and dialogues that anticipate and try to reduce the threat of WMD capabilities.

The CCC has a respected track record for providing research and timely analysis on a variety of topics to leading decision makers in the U.S. national security community. Located in the Naval Postgraduate School, the CCC is the research wing of the Department of National Security Affairs.

Research in Progress describes ongoing PASCC research. For more information, please contact pascc@nps.edu.

U.S.-South Africa Strategic Dialogue

Performer: NPS

Principal Investigator: Jessica Piombo

Cost: \$175,000

Fiscal Year(s): 2013-2014

Objective:

Since South Africa mastered nuclear technology and de-commissioned its nuclear weapons program in the early 1990s, it has become a prominent voice in non-proliferation issues. As a leader in regional stability, South Africa is poised to reduce the threat from WMD both on the African continent and at an international level.

The dialogue aims to increase the understanding of South Africa's contribution to the global nonproliferation regime and its further aspirations in nuclear energy industry and facilities. The discussions will also identify South African national security concerns in non-proliferation issues, fuel cycle in a nuclear energy environment, and the role of nuclear weapons in regional threat perceptions. Furthermore, the dialogue will facilitate increased partnership between the United States and South Africa on shared interests and U.S. national security goals in sub-Saharan Africa.

Approach:

A dialogue will be held in South Africa convening policymakers, former military officials, former and current defense officials, and academics specializing on sub-Saharan African security, U.S.-South African relations, and civil-military relations. Dialogue findings will be briefed to USG officials in Washington and at AFRICOM.
