# Joint C4I Systems Curriculum

*"The Demands of fighting both as an industrial and postindustrial power place a premium on well-educated professional men and women who have mastered the tools of modern warfare ...our military must be skilled in the use of bytes and bayonets alike"...Joint Publication 1*

## The Joint C4I Curriculum:

The Joint Command, Control, Communications, Computers and Intelligence curriculum at the Naval Postgraduate School is designed to meet the broad educational objectives endorsed by the Joint Chiefs of Staff. The overall objective is to provide students witha comprehensive operational and technical understanding of field command control and communicationssystems as applied to joint and combined military operations at the national and unified command levels. The 21 month course of study leads to a Masters of Science degree in Systems Technology.
