**conference
background**

NPS hosted conferences provide opportunities for professional interaction among NPS students, faculty and visitors as they strive to remain at the leading edge of new developments of importance to the Navy and the Department of Defense. Associated tutorials and workshops provide opportunities for professional development through continuing education and exchange of ideas.

The NPS mission is advanced education, including a blend of basic and applied research projects which support the School's curricula. Several hundred faculty projects provide creative and relevant thesis opportunities for NPS graduate students. NPS support of DoD-related conferences is a natural outgrowth of the School's involvement in research.

Individuals and groups sponsoring conferences in areas of interest to the Naval Postgraduate School community are encouraged to consider use of the conference facilities available on the Monterey campus. These facilities, along with many fine hotels, restaurants and tourist attractions in the local area, provide conference sponsors with all the ingredients necessary for creating a successful conference experience.

NPS provides conference coordination and support through its Conference Coordinator located in the Office of the Dean of Research.
