Downloaded from NPS Archive: Calhoun
Furious MAC

What:

Furious MAC is a project to understand, map, and correlate wireless hardware identifiers.

Output:

- **Decomposition of MAC Address Structure for Granular Device Inference**
  Jeremy Martin, Erik Rye, and Robert Beverly
  *Proceedings of the Annual Computer Security Applications Conference (ACSAC)*

- **Correlating GSM and 802.11 Hardware Identifiers**
  Jeremy Martin, Danny Rhame, Robert Beverly, and John McEachen
  *Proceedings of the Military Communications Conference (MILCOM)*
  San Diego, CA,
