Current Programs

- Diverse set of robotics mission-oriented courses across NPS
- Short courses and tutorials. Developed in collaboration with SSC PAC

Under Development

- Robotics certificate
- Sustainable course offerings to support workforce needs

On Campus Course: [ME4823](#)

- ~15 students from MAE, PH, SE, ECE and CS
- Goals:
Provide students with modern tools: Linux+ROS+Git
Design challenge:
autonomous “mine”
hunting
- Outcomes:
Students have a
toolkit for completing
a thesis in robotics
- Note: Not directly
funded by CRUSER

NAVAL
POSTGRADUATE
SCHOOL

Final Project

- Champion: Mike Tall
- Compress 12-week course to 3-days
- Pilot: CoLL; Deployment: Cloud
- Expose practicing engineers to new tools and capabilities
- Variable student backgrounds
- Content: Linux+ROS+Git, with focus on sensor integration

Goals

- Meet civilian workforce needs as a precursor to degree program (SSC, NUWC, NAWCAD/WD)
- Be specific to naval concerns
- Coordinated, cross-cutting curriculum

Preliminary Design

- Four course sequence
 - Foundations: Programming and Introduction
 - Applications: Sensor Integration and Mission Application
- Hybrid distance learning
 - Majority of course work is DL and cloud-based
 - Two, one-week hands-on laboratory sessions on campus (or at remote site)

Four Courses: Parallel with on-campus

- Foundations
 - 1) AE MATLAB or CS Python
 - 2) ECE Introduction to robotics (math review, coordinate frames, simple control and path planning)
- Applications
 - 3) MAE Multi-Robot Control (ROS, multi-robot theory and practice, mission-based design challenge)
 - 4) Sensor Integration

Implementation

- \$2.7-3.2K per course + lab fee
- Participants support their own travel
- Lab weeks (on campus or remote) every other quarter

Customer Feedback

- Continue to assess how NPS can support DoD/DoN civilian workforce

Organization

- Create certificate program
 - Funding model
 - Academic structure (transfer credit, etc.)

Sustainability

- Finding the right mix of instructional modes
- Allowing maximum flexibility with cloud-based tools
