**Electro-Optic Detection in Littoral for
MIW/ASW Using Navys EODES Model and
Glider-Measured Optic Data**

Chu, Peter C.

<http://hdl.handle.net/10945/58476>

This publication is a work of the U.S. Government as defined in Title 17, United States Code, Section 101. Copyright protection is not available for this work in the United States.

Downloaded from NPS Archive: Calhoun

Calhoun is the Naval Postgraduate School's public access digital repository for research materials and institutional publications created by the NPS community. Calhoun is named for Professor of Mathematics Guy K. Calhoun, NPS's first appointed -- and published -- scholarly author.

Electro-Optic Detection in Littoral for MIW/ASW Using Navy's EODES Model and Optic Data FY16-FY17

Peter C. Chu

Naval Postgraduate School

Objectives

- Enhancement of optical detection systems to get around the obvious limitations of current acoustic detection systems especially increased fleet and port security in noisy littoral waters.

Relationship between hydrographic and optical parameters in Persian Gulf

Technical Approach

- Analyze the temperature, salinity, chlorophyll, and optical data collected by the Naval Oceanographic Office
- Assess the underwater optical transmission loss
- Identify the salinity and chlorophyll effect on the underwater optical propagation
- Implement the Navy's EODES model for the East Asian Marginal Seas such as the Yellow Sea, East China Sea, and South China Sea.

Accomplishments – 4 NPS Theses Completed

Ross F. Hammerer, Environmental Effects on Underwater Optical Transmission in the Arabian Gulf and the Gulf of Oman. MS in PO, March 2016

Alexander J. Cullen, Environmental Effects on Underwater Optical Transmission in the Adriatic. MS in METOC, June 2016

Brian Breshears, Underwater Optical Transmission in the East Asian Marginal Seas for Warfare Operations. MS in METOC, June 2016

DyAnna Rodriguez, Interannual Variability of the California Current System and Optical Characteristics from Prolonged Data. MS in METOC, June 2016

September 2016
