NPS gets involved
(See related stories inside)

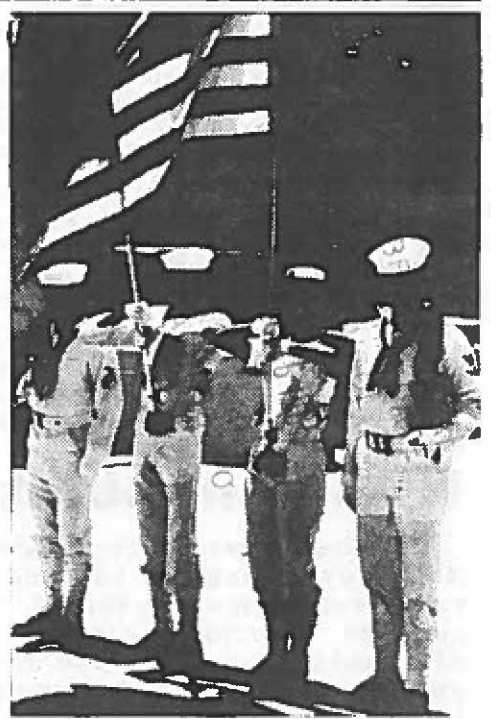

NPS fosters close ties with peninsula communities

In the four decades since the Navy acquired the gracious but troubled Hotel Del Monte, its presence on the Monterey peninsula has become a major factor in the local economy and community.

Navy ties to the local area go back more than a century. Commodore John Drake Sloat landed in Monterey in 1846 aboard USS Savannah to proclaim California a territory of the United States.

When the Hotel Del Monte fell on hard times during the Depression and World War II, the Navy leased (with an option to buy) the property and set up a pre-flight training center. Following the war, the Navy bought the hotel and other properties on the peninsula and in 1951 the Naval Postgraduate School opened its doors here.

Today, more than 2,000 permanent Navy and civilian personnel are employed by the Navy Department at NPS. On the

Color Guard always on call

The military has a tradition of lending pomp and circumstance to occasions which merit it. For the local community here, pageantry for many civic celebrations and special events is provided by the NPS color guard.

The color guard performs at Sloat Landing Day celebrations, the Golden Olden Days parade and various fairs and other special events. Members of the guard are all volunteers and are ready to perform on very short notice.

"It takes a lot of weekends-- and we've had a lot of requests for a performance only one day before the event," said SM2 Chris Cation, petty officer in charge of the color guard.

Aside from the time and the ability to perform on short notice, membership in the color guard requires pride in one's self and in the military.

"It shows off (enlisted) Navy people and shows that we take pride in being in the Navy," said Petty Officer Cation.

(continued page three)

Prof. Bouldry active in local civic affairs

There have been a lot of changes to the Monterey area since 1955, and few people have been as involved with those changes as Prof. John M. Bouldry.

At present, Prof. Bouldry is the electronic warfare academic group chairman, but besides teaching he has also found time to be active in the community.

In 1959, Prof. Bouldry was appointed by Monterey's mayor to the Monterey City Planning Commission. The Monterey freeway was one of the many projects he has been involved with over the years. He was later appointed to the Monterey Peninsula Planning Commission. Prof. Bouldry served as chairman for both planning commissions.

In 1963, Prof. Bouldry began a 16-year tenure on the Monterey city council, winning elections in four consecutive terms. He has continued to be active in the local community. Last year he served on the Economic Development Council. The council is designed to help solve the employment problems of Monterey and to protect the area's interests.

average, there are more than 1,600 officer students enrolled here full-time and another 1,500 students attend short courses.

With a payroll of just under \$100 million, the Navy is one of the leading economic elements in the area. Last year \$28 million was spent locally by the school and its tenant activities in the form of purchased supplies, construction, repairs, maintenance and energy costs.

In addition to its economic contributions, the school has long provided both facilities and human resources to the local community.

Each year the Monterey County Symphony Association stages a series of concerts in King Hall and the recently formed Monterey Bay Symphony will also perform there in 1986.

(continued page two)

From the Superintendent

The theme of this week's issue of "The Quarterdeck" deals with community relationships.

The city of Monterey has been a firm supporter of the military since the day when Commodore Sloat landed in 1846 with 75 marines.

The city was particularly pleased when the Navy purchased the old Hotel Del Monte and moved the Naval Postgraduate School here from Annapolis in 1951 because the school is a "clean" industry, prestigious and supportive of the local economy in good times and bad.

In the past six months, the Navy has come under attack by a few individuals, as you may have read in local newspaper accounts. I have chosen not to counterattack in a public forum, but I want you who read "The Quarterdeck" to know our position and understand that we want a good relationship with the community.

One issue deals with waste disposal. We feel we should be allowed to compete the annual contract for this work in order to reach the lowest possible price.

We are currently under a court injunction which prevents our awarding the contract to a firm other than the city-franchised firm. The lower-priced firm would save the school \$125,000 per year and we naturally want to realize that savings.

Another issue deals with the LAB/REC area. As you know, this 150-acre plot near the airport houses our 18-hole golf course, a ball field, a picnic grounds

and about \$10 million worth of laboratory buildings for aeronautical research.

The fairgrounds management wants half of that land for parking space and a city park. We are opposed to this land grab.

The land was purchased at a fair price, has been properly maintained and is used for the legitimate recreational needs of our staff and students. The land is also needed for possible school expansion and further intensification of activity beneath the aircraft flight path would be unsafe.

The airport commission agrees with us. Nonetheless, starting last April, we offered the fairground management an expansion in the amount of allowable parking on our land (three times more space, four times more days).

To do this, we close the golf driving range. Proceeds from the golf course are important to NPS, helping to finance other less-profitable recreational functions such as the child care center.

We've been generous in offering many of our facilities for the use of community events, and we will continue to do so. I encourage you to communicate our position to your non-government contacts. We exist to serve the citizens of our country, but we also have legitimate property rights that must be protected. I would encourage you also to talk up our mission here at NPS. I often encounter local citizens who simply have no idea of what goes on within our fences.

NPS community (from page one)

NPS has provided classroom space for the Monterey College of Law and both the library and computer center have provided support to other academic institutions. NPS facilities have also been made available to other community groups such as the Lyceum and Scouts.

A human resource

But it's people--individual active duty Navy and civilian personnel and family members, as well as the organizations to which they belong--that are woven so deeply into the fabric of the local communities in which they work and live.

It was the wife of an NPS professor emeritus who founded the Lyceum, a program which offers a variety of educational seminars to some 1,200 elementary and high school students in the area. Since its founding in 1960, a large number of NPS faculty members have served as key officers and instructors for the organization.

Faculty members have served on local government bodies, including the Monterey City Council. Prof. R. J. Renard is a long-time voluntary observer for the National Weather Service and Prof. Eugene Haderlie serves on the Monterey Bay Aquarium's board of trustees.

Local organizations benefit from help provided by student management teams. One team helped the Monterey County SPCA improve communication and management skills and reportedly saved the organization thousands of dollars in consulting fees. Other students have served as tutors for high school students in Seaside.

NPS organizations such as the amateur radio club and wives' clubs also contribute much to the local community. Recently, 20 members of the amateur radio club provided around-the-clock emergency communications in support of local firefighters.

Historical tours of the local adobe homes are conducted by volunteer members of the Officer Students' Wives Club (OSWC). The OSWC also conducts fund-raising events and contributes to local charities. Members of the Staff Wives Club are active in organizations ranging from the Junior League to Meals on Wheels.

Each year NPS and visiting Navy ships actively participate in Sloat Landing ceremonies and the NPS color guard participates in many local parades and patriotic events. Visiting Navy ships are also popular attractions when conducting public visiting. (continued page three)

NPS active in Lyceum programs

Since 1960, the Lyceum has played a vital role in the educational development of Monterey Peninsula children.

Founded by Vera Hering, wife of NPS Prof. Emeritus Carl A. Hering, the Lyceum began as a mentor program, providing gifted children with a chance for one-to-one advanced instruction in the sciences.

The Lyceum's programs have evolved over the years and now offers seminars on the visual and performing arts, humanities and sciences to more than 1,200 students a year.

But one thing which has remained constant during the 25 year history of the Lyceum is the support provided by NPS. From the use of classrooms to the volunteer efforts of the faculty and staff, NPS has helped to offer unique learning opportunities to peninsula youth.

Van Buskirks help with fundraisers

The strength of American communities has always relied upon citizen participation.

Active citizens, like Navy LT Scott Van Buskirk and his wife Mindy, give definition to a community and even help to finance important community programs.

Since becoming a member of Kiwanis last January, LT Van Buskirk has helped in the Special Olympics, Spalding Golf Tournament and Squid Festival. The fundraisers are a significant economic resource, contributing to activities like the Hospice (a health care service for people with life-threatening illnesses) and United Way.

"We raised \$17,000 this past year in the Spalding Tournament," he said.

In addition to his studies, work on the NPS student council, and civic work through Kiwanis, LT Van Buskirk also finds time to coach basketball for fifth and sixth graders at the YMCA. Mindy provides volunteer services in the vacation bible school at La Mesa and teaches "children's church" to toddlers.

The activities are something which they both cherish. "We have a lot of fun and get a lot out of it," he said.

NPS community

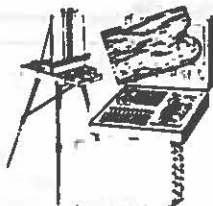

(continued from page two)

The examples cited above are only the tip of the iceberg. Just as important are the many unsung individuals--Little League coaches, scoutmasters, PTA committee members, Sunday school teachers, Red Cross CPR instructors--the active duty military, faculty and civilian staff of NPS and their dependents who actively serve and "make a difference" in their local communities.

Color Guard (from page one)

According to SN June Fetui, a color guard member, acknowledgment of a job well done is one of the primary rewards for being a member of the guard.

"At a Veteran's Day ceremony a Marine Corps officer and a lot of the veterans told us they thought we'd done a really good job. It makes you feel good when people tell you that you look sharp and executed the drills well. It makes it all worth it," she said.

OSWC member dedicated to local art

Because Monterey is one of the most scenic areas in the world, it is an ideal place for an artist and Rosemarie Manke is one artist who has taken full advantage of this opportunity.

An OSWC member highly dedicated to her work in the community, she is a past president of the Central Coast Art Association, where she has served as membership chairman for over six years. The job has involved various public relations-related tasks including hostessing, and receiving and hanging art work while judging is held.

Mrs. Manke is also on the Monterey County Fair Art committee and an active member in the Monterey Peninsula Watercolor Society.

An artist for over eight years, she prefers watercolor painting, and recently had two paintings selected for display in the Professional Building at the Monterey County Fair.

"I enjoy knowing who's who and what's going on" she said about her contributions to the various art organizations.

Mrs. Manke can be found, on a rotational basis, working any given weekday from 1130 to 1500 at the Eagle's Eye art gallery in the basement of Herrmann Hall.

OSWC contributes to community

The annual art auction in March, sponsored by the NPS Officer Student Wives Club (OSWC), brings in nearly \$8,000 -- \$500 of which is distributed to local community programs. Recipients include local schools, the Monterey Park and Recreation department, YMCA, Lyceum program, and boy and girl scout programs.

The OSWC, which normally has a membership of about 400 members, consists of all service branch wives, NPS staff wives, retired staff wives.

Each April, members and their spouses host one of the open tours of one of the historical homes in Monterey, such as the Larkin or Stevenson homes.

Other contributions include the welcome aboard gathering the OSWC hosts each quarter. This serves to welcome all newcomers to the community. The Monterey Peninsula College, Monterey Library, Monterey Parks and Recreation department, Monterey Art and Historical Association and numerous schools and scout troops attend to extend their initial greetings.

Rec news

Indoor sports return

Interested individuals may sign up for the volleyball and basketball teams. Competition will begin the first week of October. Call 646-2466 for additional information.

O club

A wine tasting festival, co-sponsored by the OSWC and officer's club, will be held tomorrow from 1700 to 1900 in the El Prado Dining Room.

Classified ads

Ads must be placed by NPS personnel (faculty, students, staff) and be noncommercial in nature.

1982 KAWASAKI KZ440 TWIN low mileage (1700). Ex. cond., full cover incl. \$1100. 646-8708.

The stories about NPS people in this week's "Quarterdeck" provide a quick glimpse of some the important contributions we are making in the community. There's probably a lot more to be said - like the volunteer work by nine NPS staffers who escorted handicapped people around the fair last week. We'll tell that story in next week's paper. Let us know what others have been doing so we can tell that story too.

Temporary parking for injured

NPS personnel requiring a special parking space due to disability such as a broken leg can now ask the Security office for a temporary reserved spot. This is not the same as a handicapped space which is only for personnel whose cars have HP plates.

Catholic seminar to be held

Men and women are invited to attend a seminar on the role women play in the Catholic Church, sponsored by the NPS Catholic chapel.

The seminar will consist of small group discussions about the church's treatment of women. The seminar will be held this Sunday in the La Novia Room, 1300-1600.

FWP to host guest speakers

In recognition of Women's Equality Day, the NPS Federal Women's Program (FWP) will host two special speaking engagements on August 27 and 28.

On Tuesday, August 27, the FWP will sponsor a panel presentation "Recognizing Your Potential." The panel members will include Prof. Harriet Rigas, chairman of the electrical & computer engineering department, CDR Mary McBride, commanding officer of enlisted personnel, Ms. Kathryn Burwell, EEO officer at DLI, and Ms. Deanna Tovar, an instructor at DLI. The presentation will be held in Spanagel Hall, room 101A, beginning at noon.

At 1200 on Wednesday, August 28, Prof. Rigas will present "Alice in Engineering Land," paralleling women in non-traditional jobs with the fictional Alice.

FWP presentations will be approximately one hour in length. For further information contact Grace Ceglie at ext. 2557.
